

APOPTOS

10835 Road to the Cure

Prevost Construction recently completed a 10,278-square-foot renovation of a chemistry and biology lab for Apoptos, a cancer research firm. Prevost Construction was retained by the building's owner, BioMed Realty, for the project which is located in the Torrey Pines area of La Jolla. The project included the partial conversion of the existing biology lab to a chemistry lab. This required the installation of a new 20-ton air handler to support 10 new fume hoods and a tissue culture lab. New lab benches were provided throughout with distribution of nitrogen gas, compressed air, and vacuum to support the tenant's equipment including several mass spectrometers and a new NMR.

AMOUNT: \$800,000

DESCRIPTION: 10,278-SQUARE-FOOT LABORATORY REMODEL
