

BEKAERT SPECIALTY FILMS

4540 Viewridge Avenue

Prevost Construction completed a \$1.5 million industrial remodel for a state-of-the-art clean room area at the headquarters of Bekaert Specialty Films. The company retained Prevost Construction for overall project management and construction of a class 10,000 clean room which will be used for the manufacturing of a variety of films for automotive and architectural glass and a wide breadth of industrial applications. The addition of ancillary rooms with air showers interlocking the clean room production areas to the warehouse and supporting office spaces provided necessary final touches.

AMOUNT: \$1.5 MILLION

DESCRIPTION: CLASS 10,000 STATE-OF-THE-ART CLEAN ROOM AND ANCILLARY ROOMS

"Prevost construction is a best-in-class contractor whose ability to transform our space to meet our needs allowed us to continue to produce specialized films for the most demanding market segments. Prevost looked at our design for the remodel and found ways to add value and enhance the project. They tracked our budget carefully and managed the process efficiently."
