

# COUNTRYSIDE VET HOSPITAL

29206 Cole Grade Road

**Prevost Construction** negotiated a design-build from concept to completion for The Countryside Veterinarian Hospital located in North San Diego County. This premier facility includes a surgical center, dental area, exam rooms, isolation areas and recovery areas. It is equipped with oxygen, a scavenging system, central vacuum, exhaust and special ventilation systems. Prevost ensured the extensive plumbing and drain systems were accessible from under the foundation. The entire flooring system is seamless epoxy, raised on all walls from eight inches in the general areas, to four feet in the large animal containment areas. Custom millwork and cabinetry design were critical to the function of each area in the hospital.

**AMOUNT:** \$650,000

**DESCRIPTION:** 3,700-SQUARE-FOOT GROUND-UP VETERINARY FACILITY
