Prevost renovates golf school

By CARLOS RICO
The Daily Transcript

SAN DIEGO — **Prevost Construction Inc.** recently completed customized tenant improvements for the San Diego Golf Academy (SDGA).

The 18,486-square-foot facility was given a facelift to multiple classrooms and training rooms for its growing student base, which currently totals 237 students.

The renovations also included construction of a state-of-the-art club construction and repair workshop, break room lounge and new recep-

tion area.

Prevost also was instrumental in the close coordination of tenant vendors that provided HD camera systems to be used for the swing analysis machines, putting greens, golf simulation machines and open driving range areas.

"The golf industry is evolving and increasingly competitive," said Jamie Prevost, president of Prevost Construction in a statement. "We are proud that we were able to provide improvements that would reflect the image that SDGA was looking for as well as the functionality it needs to

help students prepare for a professional career."

The SDGA is a two-year golf academy that helps students take their skills to the next level and prepare them for a golf career. The academy offers a curriculum of golf instruction and golf business management.

Subcontractors involved on the project included **H&H Demo, American Insulation, McBride Door and Hardware, Ski's Glass, KT Construction, GP Acoustics, Howard's Rug Co., General Coatings, Mission Valley Cabinets, Gus Ballas Plumbing, Control Air Corporation** and **Sunwest Electric.**
